

ft_open_readorwrite

```
graph LR; A[ft_open_readorwrite] --> B[halt_exit_fd]; B --> C[ft_fprintf];
```

A flowchart illustrating a sequence of three functions. The first function, 'ft_open_readorwrite', is highlighted with a gray background. A blue arrow points from it to the second function, 'halt_exit_fd', which has a white background. Another blue arrow points from the second function to the third function, 'ft_fprintf', which also has a white background. All three functions are enclosed in rectangular boxes with black borders.

halt_exit_fd

ft_fprintf
